Email: everest.hemu@gmail.com
Mobile: +91 7018416120

SKILLS

Languages:	Python, SQL, Java, HTML
Tools/Platforms:	Tableau, MS SQL Server, Visual Studio, Jupyter Notebook, Pycharm
Soft Skills:	Communication, Team Player, Adaptability

PROJECTS

CodebaseQ&A – AI Repository Assistant Python, RAG, FAISS, Groq, Streamlit Github Link	Jun' 26
- Built a RAG-based AI assistant that enables developers to query and understand GitHub repositories using natural language, reducing the effort required to navigate large codebases. - Implemented semantic code search using HuggingFace embeddings and FAISS to retrieve relevant code snippets, and integrated Groq Llama 3 to generate context-aware and intelligent responses. - Developed a Streamlit-based interface with AI-powered README generation, enabling automated repository documentation and improving codebase accessibility and understanding.	

Full Mesh Topology using Graph & BFS Java, Graph, BFS, HashMap, LinkedList Github Link	Apr' 25
- Implemented a full-mesh network topology in Java using Graph data structures and adjacency lists, representing nodes and their direct connections within the network. - Developed BFS-based connectivity testing with level-wise traversal to verify network reachability and ensure that nodes can communicate through the available connections. - Implemented unique node/IP validation and IPv4 format checking to maintain valid network configurations, while using HashMap and LinkedList for efficient node and connection management.	

Smart Expense Tracker with Analytics Python, Streamlit, Pandas, Scikit-learn Github Link	Jun' 25
- Developed a Streamlit-based expense tracker with interactive dashboards to monitor spending patterns, track financial habits, and provide clear insights into personal expenses. - Implemented habit scoring, recurring subscription detection, and expense prediction using Scikit-learn Linear Regression to help users understand and plan their future spending. - Added category-wise expense analysis, interactive data visualizations, expense management features, and privacy mode for secure and user-friendly financial tracking.	

TRAINING

Lovely Professional University	Jun'26 – Jul' 26
AI Engineer Launchpad: Mastering LLM and Agentic AI Certificate	
- Built a strong foundation in LLMs, prompt engineering, intelligent agents, and advanced reasoning techniques for developing practical and effective AI applications. - Gained hands-on experience with LLM fine-tuning, Retrieval-Augmented Generation (RAG), and knowledge-grounded systems for building domain-specific AI solutions. - Explored Agentic AI and multi-agent architectures, including agent orchestration, evaluation, deployment, and practical implementation through a capstone project.	

CERTIFICATES

Data Visualization (Excel & Tableau) Tech Veda	Jan' 25
Introduction to DSA MOOC by Coding Tantra	Mar' 25
Digital Systems: From logic gates to processors Coursera	Sep' 25
AI Engineer Launchpad: Mastering LLMs and Agentic AI LPU	Aug' 26

EDUCATION

Lovely Professional University	Punjab, India
Bachelor of Technology - Computer Science and Engineering(DS &ML); CGPA: 8.02	Aug' 24 - Present
Sri Chaitanya Senior Secondary School	Hosur, Tamil Nadu
Class 12: Percentage: 81.4%	Apr' 23 – Mar' 24
Delhi Public School	Rewari, Haryana
Class 10: Percentage: 90.5%	Apr' 21 – Mar' 22
